Good morning Melissa.

You would use whatever city was used when requesting an SSID, which is a step prior to CERCLIS/SEMS. Should you, as the OSC, determine that the city is different, then you would let us know so that the update can be made. So, for this particular site when the SSID was requested, the address provided, was as you find below:

**A3XK:**

West Virginia Chemical Leak

1015 Barlow Drive

Charleston, West Virginia 25311

Hope this answers your question. Thanks and enjoy your day!

Sonia

**Subject:** Question about CERCLIS

Hi Sonia,

I think if I remember correctly you are the point of contact for CERCLIS entries? I had a question, because I wanted to confirm what city would be entered into the CERCLIS data base for the Charleston, WV Chemical Leak. The TDD states Etowah, WV and the name of the site is Charleston. As we are having START collect a few samples we wanted to make sure the city we used would match the CERCLIS number assigned to it.

Thanks!

Melissa
